Clean-Flo Laboratories, Inc.
4342 Shady Oak Road
Hopkins, Minnesota 55343

Attn: Bob Laing

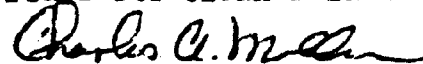

Dear Mr. Laing,

It has been one year since Clean-Flo installed the multiple inversion equipment in Robinson Lake. I am writing this letter to inform you of the successes to date.

The water quality of Robinson Lake has been restored to the point where we can see the bottom of the lake once again. This has not been possible for the last few years and is really a pleasure to have clean water. This has also resulted in a much better fishing lake. All our able bodied fisherman are catching Large Mouth Bass, Lake Trout, Brown Trout and Brook Trout, plus many other species .. It has really improved the over all picture of the Lake.

As far as overcoming the weed problem, we are making gains in that department also. Our Lake is now open in its entirety for boating. One year ago, it was only possible to use half the Lake for boating. Improvements are being made each passing day, and this Association is more than happy with its results.

Yours for cleaner lakes

Charles A. Miller, Pres.
Taconic Shores Property
Owners Association Inc.
