Hi Brian,

Just dispensed the last Nualgi treatment of the year and, after 1.5 seasons using your recommended products, it is clear that, along with aeration, the system works beautifully. We have vastly reduced growth, the bottom is less mucky and overall it is a much more pleasant pond to use for swimming and fishing. Thank you.

The only continuing problem is the Watermeal which, for two years, has afflicted most ponds in our area. Any hope that it will eventually disappear? We had received a license to use a chemical to remove it but changed our minds, feeling it was better to live with the modest nuisance of the Watermeal than taking a chance of ruining the good your stuff is doing regularly.

If you'd like, you may use our review in an ad.

Best,

Ed
