We purchased the 1P3002 inversion system and associated pond products from Clean-Flo in 2013.

We started with severe algae problems, muck on pond bottom, and run-off that contained clay and chemicals from farm land and a golf course. The results from the Clean-Flo system were fantastic. By the end of 2013, the clarity of our water had improved dramatically and muck was reduced significantly.

Thank you, Thank you, Clean-Flo for your products and, Brian, for your patient assistance in developing a complete system for our pond .

The fish and grandkids are just as happy as we are!

Jim and June Morley, Cloverdale, Indiana
